PM Narendra Modi's COP26 address

In light of India's energy situation, PM Modi has proposed a balanced five point sustainability agenda.

In the midst of this global brainstorming on climate change, on behalf of India, I would like to present five nectar elements, 'Panchamrit', to deal with this challenge.

India will take its non-fossil energy capacity to 500 GW by 2030.

2 3 India will meet 50% of its energy requirements from renewable energy by 2030.

India will reduce the total projected carbon emissions by one billion tonnes from now till 2030.

4 By 2030, India will reduce the carbon intensity of its economy by less than 45%.

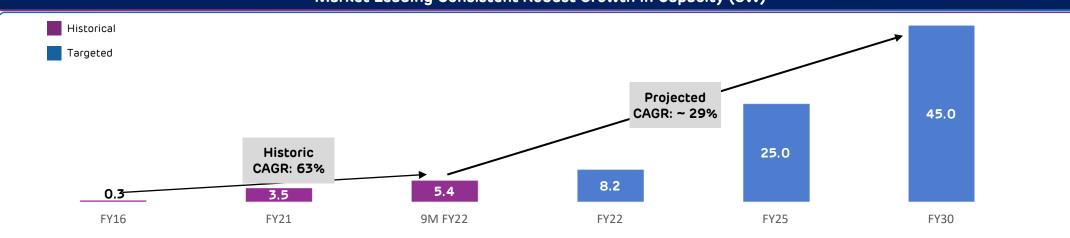

5 By the year 2070, India will achieve the target of Net Zero.

These **'Panchamrits'** will be an unprecedented contribution of India to climate action.
