

Climate change is one of the most pressing issues facing the world today, Adani Green Energy Limited (AGEL) acknowledges this global systemic risk and recognizes that concerted and sustained global action is required if the world is to avoid the adverse impacts of a warming planet.

At AGEL, we are striving to make renewable energy a viable and affordable alternative to fossil fuels and aim to be the largest renewable energy company in the world by 2030.

AGEL supports the goals of the Paris Agreement and is committed to managing climate change risks across its business operations and to developing strategies in line with global best practice. This policy is in alignment with India's need for cost-effective energy to meet the country's economic growth ambitions and climate commitments.

AGEL will undertake the following:

- Measure and disclose total GHG footprint annually using reputed global platforms.
- Be the benchmark in the industry segment for its emission footprint.
- Engage actively in climate change advocacy and the shaping of regulations in its operations.
- Identify potential physical impacts of climate change on day-to-day business activities and introduce appropriate adaptation response measures.
- Identify and implement opportunities for energy savings and emission reduction throughout the business and in new projects through innovation and technology.
- Regularly review the potential for partnership opportunities for mitigation of and adaptation to climate change.
- Consider all climate risks and opportunities and integrate them in our business strategy.
- Foster a culture of energy and carbon savings among the employees which further underpins innovation.
- Promote AGEL's climate change awareness initiatives with internal and respective external stakeholders Conduct Capacity building and training on climate change impacts for our employees and value change partners.
- Monitor, report and audit energy consumption, greenhouse gas emissions, targets, results, and activities and publish transparently our progress through public disclosures to the government and other relevant stakeholders.

The content and robustness of implementation of this policy will be reviewed annually and revised wherever applicable.

This policy applies to all AGEL's operation and project's locations.
