

Adani Green Energy Ltd. (AGEL) is committed to sustainable resource utilization practices. Resource conservation is a key element of sustainable business practice. The intensifying competition for natural resources, including land, water, and fuel may lead to compromising the ability of future generations to meet their own needs. This makes practicing and promoting the efficient use of natural resources vital for improving the sustainability performance of AGEL.

We emphasize the judicious use of natural resources through a strategic focus on resource conservation. The resource conservation policy provides an objective framework for demonstrating, evaluating; and improving procurement, manufacturing, and supply chain resource efficiency.

AGEL commits to the following objectives:

- To comply with all applicable resource use regulations, such as those for natural resources, including water, waste, and land.
- To incorporate the principles of resource circularity in processes and generation of renewable power.
- To align procurement and supply chain management activities principles for sustainable materials management.
- To demonstrate resource stewardship and set efficient resource utilization benchmarks.
- To incorporate life cycle analysis in project development processes.
- To continually seek to monitor, reduce and report on the consumption of non-renewable resources for business activities.
- To define goals, targets, and action plans to reduce resource consumption. To explore opportunities to Reduce, reuse, and recycle materials used in business processes.
- To increase transparency in the supply chain to gain a better understanding of material flows and opportunities for optimization.
- To develop and implement technologies to reduce specific resource use, waste generation, and promote sustainable resource use.
- To collaborate with external stakeholders, including government bodies, R&D and academic institutions, for improving resource efficiency.
- To develop metrics to measure specific resource consumption and undertake projects and programs to improve resource efficiency.
- To raise awareness amongst our internal and external stakeholders on the importance of resource efficiency and waste management

The policy shall be reviewed periodically and updated as necessary.
